PROFESSIONAL SUMMARY

Enthusiastic Computer Science undergraduate with a strong foundation in full-stack web development and programming. Proficient in JavaScript, Python, and MERN stack (MongoDB, Express, React, Node.js) with hands-on experience in building responsive web applications and REST APIs. Familiar with basic machine learning concepts and data handling, eager to apply technical skills to real-world problems in a growth-oriented organization.

TECHNICAL SKILLS

Languages	Java, Python, C++
Frontend	React.js, HTML5, JavaScript
Backend	Node.js, Express.js, RESTful API Design
Databases	MongoDB, SQLite (Basic)
Tools & Platforms	Git, GitHub, VS Code, linkdin, leetcode
AI Tools	ChatGPT, Gemini, Claude

EDUCATION

Bachelor of Technology — Computer Science & Engineering	2023 – 2027
Parul University, Vadodara CGPA: 6.93 / 10	
Higher Secondary (Science)	2020 – 2022
Adarsh Junior College Aggregate: 87.50%	
Secondary School	2019 – 2020
Shree Saraswati Bhavan High School Aggregate: 88.60%	

PROJECTS

CareerGap Analyzer – Job Finder

MERN Stack · OpenAI API

- Built an AI-driven platform to detect career gaps and intelligently match users with suitable job opportunities based on their profile and experience history.
- Integrated OpenAI API to power smart recommendations and gap analysis, providing actionable insights to help users bridge skill or employment gaps.

AI-Based Livestock Disease Detection

Python · Flask · scikit-learn · Bootstrap · REST APIs

- Built an AI-powered web application to monitor livestock health and detect early disease risks using real-time sensor data, enabling proactive intervention for farmers.
- Implemented machine learning models with scikit-learn to classify health anomalies, with a responsive Bootstrap frontend and RESTful API backend built on Flask.

HACKATHONS & ACHIEVEMENTS

PU CODE HACKATHON 3.0	Certificate of Participation (23–24 Jan 2026)
AESTR ALPHA AI SUMMIT	Certificate of Achievement + Certificate of Participation (6–7 Feb 2026)

CERTIFICATIONS

Generative Ai
